In light of the recent horrific attack on America I urge you to not only increase security at all nuclear facilities but also to cancel any and all attempts to transport and store the waste from these plants at yucca mountain in Nevada. It seems pretty obvious that our government has not been able to protect American citizens from this "new" threat of terrorism. The risk of greater calamity from nuclear terrorism is sufficient to disband such ludicrous concepts as transporting such dangerous materials across the United States and storing it in an unsafe underground facility. Please continue temporary storage at facilities until a safer recycling or storage option becomes scientifically available.

Terry Jensen
